**Dry skin may have just met its match**

Despite lotion application after lotion application, dry skin just can seem to escape us.

Hill Dermaceuticals may just have the answer: a light-weight oil that helps skin stay moisturized.

Hill Moisture Riser is made with a refined peanut oil, which the company says has the right molecular structure and weight to penetrate the skin's surface.

To use the product, first dampen your skin with water, then rub in the oil.

To order Hill Moisture Riser (6 ounces, \$19.75), call toll-free 1-888-445-5468.
